On Your Investment

SEE THE DIFFERENCE PROFESSIONAL CONSULTING MAKES!

You have more functionality at your fingertips than you think - at clubsystems group, we offer various forms of in-depth consulting to ensure you get the most from your system. Our consultants provide you with knowledge and tools which enable you to fully utilize your clubsystems group software and, in turn, allow you to make better, more informed business decisions to provide a higher level of member services. Listed below are the three main training options available to each and every clubsystems group software client.

ON- SITE CONSULTING

On-Site Consulting gives you the most value by having a consultant on-site to assist in the effective and efficient usage of your clubsystems group software. The consultants have years of experience working with clubsystems group and the club industry and, thus, will offer the best advice on how to set up your software to meet your business needs. Having a consultant on-site will provide great value for your club and will leave you and your staff feeling confident using your clubsystems group software. For more information, e-mail us at **professionalservices@clubsys.com**.

ONE-ON-ONE E-TRAINING

One-On-One E-Training is an Internet based learning option that is cost effective and allows you to work with your own data while receiving one-on-one assistance. This means of learning is great for newly hired staff who are just beginning to learn how to utilize clubsystems group software, as well as existing staff who can learn something entirely new. You can have as many staff members attend as you wish and since these are short online sessions, your staff need to take less time away from their day to day jobs. One-On-One E-Training gives you the personal attention you need without incurring any extra out of pocket expenses. For more information, e-mail us at **professionalservices@clubsys.com**.

WEBINAR TRAINING

Webinar Training is a very practical way of obtaining continuing clubsystems group education. You will be able to keep up to date with new features and strengthen your knowledge of clubsystems group applications. A new course itinerary is published each month, and you can choose from a wide array of pre-defined courses. These free, shorter training sessions are ideal for the new user, or for more advanced topics that are not processed as frequently. You can sign up for these sessions online and partake from the comfort of your own office. And, there is no limit to how many employees may attend! For more information, e-mail us at **education@clubsys.com**.
